IndigoVerge

Building a great software solution requires more than technical expertise.

ABOUT /

IndigoVerge is a software development company. We are technology experts who can help you build your product from scratch, or merge seamlessly with your existing operations to provide more development power and flexibility. We work with you every step of the way to turn your ideas into the desired solution.

Since our incorporation in 2006 we have delivered over 100 products to satisfied clients all over the world. From big enterprise solutions and complex mobile applications to single page apps.

Talking to us is *easy*. You don't need to worry about the tech lingo; tell us what you need and we'll figure out how to do it.

OUR PHILOSOPHY /

We know that crafting a great piece of software requires more than technical expertise. It takes transparency and mutual trust, ongoing communication and collaboration, deep-dives into your domain and commitment to the project. These activities set the basis for long-term, successful and rewarding relationships with our clients and employees alike.

SERVICES /

Custom Software Development	Dedicated (extended) Development Team	Internet of Things (IoT) Development	Digital Marketing & Automation
Do you have a business idea for a software project but are unsure about specifications, technology solutions or even just how to approach developing the project?	If you need extra hands on your project, but don't have the time or desire to do new recruitment, IndigoVerge can set you up with a dedicated software development team.	If you need a technology partner experienced in IoT development - meet our team! Our experience in IoT dates back to 2012, and since 2017 we've been extending our expertise to industrial automation.	You launched a great product but are seeing low conversion rates? Nurturing your leads is a chaotic and time-consuming process? You have no marketing resources to cater for lead generation and conversion?
Our team of software consultants, architects and development leads will work with you every step of the way to turn your idea into the desired solution, whether it's a complex cloud platform, mobile app or a simple web page.	You have full management control over tasks and priorities, whilst we facilitate the process, support the developers involved and cater for all employer responsibilities like team motivation, benefits and work environment.	We cover the entire development stack, from the hardware to the mobile and web app. Sticking to Lean principles, we split the process in small steps, ensuring smooth deliveries while reducing risks and costs.	We have the marketing resources, skills and experience to create and implement a solid, results-oriented marketing automation strategy for your business and drive traffic, leads and sales.

FEATURED CLIENTS /

FEATURED PROJECTS /

Edge manager /IoT, Industrial Automation/ - Read more
Edge Manager is designed for any IoT products that require remote management and control of various devices and the applications installed on them. Suitable for integration with SCADA systems.

Ondo /Smart agriculture, IoT/ - Read more
Ondo is an intelligent solution for analysis and precise management of the climate, irrigation and fertilization of greenhouses and open fields. It allows optimal control of every process - anytime, anywhere - leading to higher efficiency and productivity.

SCS Control system for LED streetlights /IoT, Smart Cities/ - Read more
SCS is a system that allows our clients to easily monitor and control the street lights. It consists of a hardware controller (power meter, powerline communication, GPRS), cloud back-end and web front-end.

BeNet /Tourism & Travel/ - Read more
Tourist platform providing location-relevant information directly on your mobile. Local businesses can use the platform to advertise their services, whilst visitors get location-based tourist info pushed to them, straight on their phones.

WHY CHOOSE US /

➔ **15+ YEARS OF EXPERIENCE AND KNOW-HOW**

Hence, our understanding and know-how already spans a broad range of business spheres.

➔ **TALKING TO US IS EASY**

We communicate the project progress and challenges in a simple, timely and understandable manner.

➔ **WE BELIEVE IN OPEN & TIMELY COMMUNICATION**

Transparency and communication build trust and we think trust is the basis for a successful, long-term relationship.

➔ **WE FOLLOW LEAN METHODOLOGY**

Having bootstrapped on our own startup projects, we trust in lean principles in software development.

➔ **WE CAN ADAPT**

We will adapt to your technologies and processes, even if that requires investment in learning/expanding our team.

➔ **YOUR SUCCESS IS OUR SUCCESS**

Most of our projects come from referrals. We know that a happy customer means many referred leads to us.

You are welcome to get to know us better! Come meet us in our office for a coffee and an introduction to our team!
